

28-62.

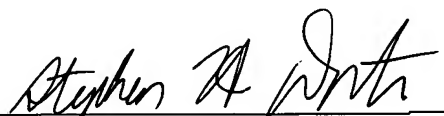

Remarks

The claims stand rejected under 35 U.S.C. § 112, first paragraph for lack of enablement. Although Applicants continue to respectfully but completely disagree with the Examiner's contentions, the claims have been amended to expedite allowance. To this end, Applicants have included "phenyl" within the definition for R², as well as naphthyl as suggested by the Examiner, since many of the specific compounds of the invention have a phenyl at that position. Those compounds likewise fall within the scope of elected group XI. Withdrawal of the rejection is requested.

Allowance of the claims and passage of the case to issue is respectfully solicited. Should the Examiner believe a discussion of this matter would be helpful, she is invited to telephone the undersigned at (312) 913-0001.
